Sample Assessment Materials for first teaching September 2018

(Time: 1 hour 30 minutes)

Paper Reference **WMA11/01**

**Mathematics**

**International Advanced Subsidiary/Advanced Level  
Pure Mathematics P1**

**You must have:**

Mathematical Formulae and Statistical Tables, calculator

Total Marks

**Candidates may use any calculator permitted by Pearson regulations. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.**

### Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B).
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided  
– *there may be more space than you need.*
- You should show sufficient working to make your methods clear. Answers without working may not gain full credit.
- Inexact answers should be given to three significant figures unless otherwise stated.

### Information

- A booklet 'Mathematical Formulae and Statistical Tables' is provided.
- There are 10 questions in this question paper. The total mark for this paper is 75.
- The marks for **each** question are shown in brackets  
– *use this as a guide as to how much time to spend on each question.*

### Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.
- If you change your mind about an answer, cross it out and put your new answer and any working underneath.

3. Solve the simultaneous equations

$$y + 4x + 1 = 0$$

$$y^2 + 5x^2 + 2x = 0$$

(6)

4. The straight line with equation  $y = 4x + c$ , where  $c$  is a constant, is a tangent to the curve with equation  $y = 2x^2 + 8x + 3$

Calculate the value of  $c$

(5)

5. (a) On the same axes, sketch the graphs of  $y = x + 2$  and  $y = x^2 - x - 6$  showing the coordinates of all points at which each graph crosses the coordinate axes. (4)

- (b) On your sketch, show, by shading, the region  $R$  defined by the inequalities

$$y < x + 2 \quad \text{and} \quad y > x^2 - x - 6 \quad (1)$$

- (c) Hence, or otherwise, find the set of values of  $x$  for which  $x^2 - 2x - 8 < 0$  (3)

6.

**Figure 1**

Figure 1 shows a sketch of the curve  $C$  with equation  $y = f(x)$

The curve  $C$  passes through the origin and through  $(6, 0)$

The curve  $C$  has a minimum at the point  $(3, -1)$

On separate diagrams, sketch the curve with equation

(a)  $y = f(2x)$  **(3)**

(b)  $y = f(x + p)$ , where  $p$  is a constant and  $0 < p < 3$  **(4)**

On each diagram show the coordinates of any points where the curve intersects the  $x$ -axis and of any minimum or maximum points.
