Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.
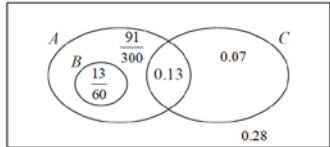

EDEXCEL IAL MATHEMATICS
General Instructions for Marking

1. The total number of marks for the paper is 75.

2. The Edexcel Mathematics mark schemes use the following types of marks:

- **M** marks: method marks are awarded for 'knowing a method and attempting to apply it', unless otherwise indicated.
- **A** marks: Accuracy marks can only be awarded if the relevant method (M) marks have been earned.
- **B** marks are unconditional accuracy marks (independent of M marks)
- Marks should not be subdivided.

3. Abbreviations

These are some of the traditional marking abbreviations that will appear in the mark schemes.

- bod – benefit of doubt
- ft – follow through
- the symbol $\sqrt{}$ will be used for correct ft
- cao – correct answer only
- cso - correct solution only. There must be no errors in this part of the question to obtain this mark
- isw – ignore subsequent working
- awrt – answers which round to
- SC: special case
- oe – or equivalent (and appropriate)
- dep – dependent
- indep – independent
- dp decimal places
- sf significant figures
- ∗ The answer is printed on the paper
- ⌐ The second mark is dependent on gaining the first mark

4. All A marks are 'correct answer only' (cao.), unless shown, for example, as A1 ft to indicate that previous wrong working is to be followed through. After a misread however, the subsequent A marks affected are treated as A ft, but manifestly absurd answers should never be awarded A marks.

5. For misreading which does not alter the character of a question or materially simplify it, deduct two from any A or B marks gained, in that part of the question affected.

6. Where a candidate has made multiple responses <u>and indicates which response they wish to submit</u>, examiners should mark this response.
   If there are several attempts at a question <u>which have not been crossed out</u>, examiners should mark the final answer that is the <u>most complete</u>.

7. Ignore wrong working or incorrect statements following a correct answer

(b)	$P(Y) = \dfrac{7}{12} \times \dfrac{2}{11} + \dfrac{3}{12} \times \dfrac{2}{11} + \dfrac{2}{12} = \left\{ \dfrac{42}{132} \text{ or } \dfrac{7}{22} \right\}$ **or** $P(\text{Yellow and two counters}) = \dfrac{7}{12} \times \dfrac{2}{11} + \dfrac{3}{12} \times \dfrac{2}{11} = \left\{ \dfrac{20}{132} \text{ or } \dfrac{5}{33} \right\}$ $\dfrac{P\left([Y \cap R] \cup [Y \cap B]\right)}{P(Y)} = \dfrac{"\dfrac{20}{132}"}{"\dfrac{42}{132}"}$ $\qquad\qquad = \dfrac{20}{42} \quad \underline{\text{or}} \quad \dfrac{10}{21} \quad \text{oe}$	M1 M1 A1 (3) **[5 marks]**

	Notes	
(a)	1st B1 for the remaining probs on first set of branches and at least one on 2nd set 2nd B1 for a fully correct tree diagram with all the correct probabilities	
(b)	1st M1 for a correct ft expression for $P(Y)$ or $P(\text{Yellow and two counters})$ft their tree diagram eg $1 - \dfrac{7}{12} \times \dfrac{6+3}{11} - \dfrac{3}{12} \times \dfrac{7+2}{11}$ **NB:** The method is implied by the numbers in curly brackets but we do not need to see them to award the mark. 2nd M1 for a correct ratio formula (symbols or words) <u>and</u> at least one correct ft prob or fully correct ft ratio. Do not follow through probabilities > 1 or < 0 A1 for $\dfrac{10}{21}$ or exact equivalent. (Allow $0.\dot{4}7619\dot{0}$) **NB** if an exact correct fraction is not given and an awrt 0.476…. is given it would get M1M1A0 if from correct working Generally if the answer is correct then award full marks (unless from obvious incorrect working) or notes indicate otherwise

		[Using $p + q = 0.52$] $\quad 0.52 \times "(0.2+q)" = q$ **or** $0.52(0.72 - p) = 0.52 - p$	M1
		$q = \dfrac{13}{60}$	A1
		$p = \dfrac{91}{300}$	A1 (6)

		Notes	**[12 marks]**
(a)	B1	B and C seen. If they include A then B0	
(b)	1st M1	for a correct equation for $P(C)$ using independence.	
	1st A1	for $P(C) = 0.2$ correct linear equation for r or s	
	2nd A1	for either $r = 0.07$ or $s = 0.28$	
	2nd M1	for using $\sum p = 1$ Allow letter r and s or their values for r and s provided they are probabilities.	
	3rd A1	for both $s = 0.28$ and $r = 0.07$	
		NB: The quotations around the 0.07 ("0.07") imply that we ft their value	
(c)	1st B1ft	for an expression (in q) for $P(B \cup C)$ ft their value of r or their "0.2" eg $0.13 + "their r" + q$ Implied by 1st or 2nd M1 below.	
	2nd B1	for a correct expression for $P(A \cap C')$ in terms of p and q or 0.52 Implied by 1st or 2nd M1below	
	1st M1	for a correct use of independence (ft their probabilities), values or letters. Implied by 2nd M1	
	2nd M1	using $p + q = 0.52$ to gain a linear equation in one variable	
	1st A1	for a correct fraction for q	
	2nd A1	for a correct fraction for p SC: If both p and q are given as equivalent recurring decimals award A0A1 eg $0.21\dot{6}$ and $0.30\dot{3}$

	Notes
(a)	M1 for any correct expression for $E(X)$ in terms of a (or a, b, c)
	A1 for $a = 0.25$
(b)	1st M1 for attempt at an expression for $E(X^2)$ with at least 3 correct non-zero terms
	2nd M1 for a correct expression for $\text{Var}(X)$ eg $"18a - c + 1" - 0.5^2$ Allow with their value of a substituted
	1st A1 for a correct equation for b (or possibly c) eg $"18a - c + 1" - 0.5^2 = 5.01$ Allow with their value of a substituted
	2nd A1 for either $b = 0.13$ or $c = 0.24$
	3rd A1ft for using $c = 1 - 2 \times "0.25" - 2 \times "0.13"$ or $b = (1 - 2 \times "0.25" - "0.24")\div 2$ to gain the correct ft answer for their 2nd value
(c)	B1 for $\{E(Y) =\}$ 1
	M1 for correct use of $\text{Var}(aX + b) = a^2 \text{Var}(X)$
	A1 for awrt 321
(d)	1st M1 for correct quadratic inequality (may be inside prob statement) or table of values
	2nd M1 for an attempt to solve or identifying correct X values
	1st A1 for $X > 0.5$ [may also have $X < -2.5$]
	3rd M1 for realising need $X = 1$ and 4 only or answer of their $(a + b)$
	2nd A1 for 0.38 (or exact equivalent) only (correct ans only 5/5)
